

Land Governance in an Interconnected World

ANNUAL WORLD BANK CONFERENCE ON LAND AND POVERTY
WASHINGTON DC, MARCH 19-23, 2018

Land and Poverty Conference 2018 Masterclass on

SESSION 13-04 | Managed Land Services

Friday, March 23, 2018 | 11:00am-12.30pm | MC 7-860, World Bank

INSTRUCTORS

Peter Hedlund, CEO – Ordnance Survey International

Jill Urban-Karr, Executive Director – Trimble Land Administration Solutions

Stephanie Michaud, Product Applications Engineer, Trimble Land Administration Solutions

MASTERCLASS SUMMARY

In this masterclass, we'll discuss current land administration challenges and identify key attributes and benefits of a sustainable, managed land services solution.

We'll discuss how such a solution reduces risk and capital investment in costly new infrastructure and provides a faster transition time to digital land and the ability to continuously evolve.

Plus, we'll **exclusively** preview our innovative vision for a managed land service with a workflow demo.

TARGETED AUDIENCE

National and Provincial Cadastre and Land Registry Officials.

Land Governance in an Interconnected World

ANNUAL WORLD BANK CONFERENCE ON LAND AND POVERTY
WASHINGTON DC, MARCH 19-23, 2018

Land and Poverty Conference 2018 Masterclass on

SESSION 13-04 | Managed Land Services

Friday, March 23, 2018 | 11:00am-12.30pm | MC 7-860, World Bank

MASTERCLASS PROGRAM

- Land Administration challenges
 - Institutional capacity constraints
 - Limited interoperability with other key registers
 - Individuals/land excluded from formal system
 - Paper-based systems
 - Unsustainable bespoke systems
 - Lack of (prioritization of) funds to build modern systems
- Managed Land Services
 - Solution attributes
 - Seamless, end-to-end land administration solution
 - Cloud-based
 - Scalable
 - Configurable
 - Leverages transformed cadastral workflow
 - “As-a-service” model
 - Support for multiple versions of data models and business processes to support a changing world.
 - Unlocking the data: integration across government, business and citizens.
 - Benefits
 - Reduced risk and capital investment
 - Faster time to deployment
 - Ability to handle expanding volumes of data and leverage scalable processing capabilities
 - Increased productivity in production of cadastral survey deliverables
- **Exclusive preview** of Trimble / Ordnance Survey Managed Land Services:
 - Field positioning and data collection
 - Management of the Cadastre and Registry
- Conclusions
- Questions
