

## **Description**

This masterclass will focus on how to improve the built environment in a way that prevents crime & violence in neighbourhoods and enhances perceptions of safety. The event features 'Mainstreaming Crime Prevention through Inclusive Environmental Design (CPTED)' methodology and real-world examples (Bank and non-Bank projects) aimed at crime and violence prevention.

## **Objectives**

- To present the theory and the key principles behind the Crime Prevention through Inclusive Environmental Design (CPTED) methodology to Bank staff/TTLs
- To present best practices in CPTED from around the world in the key sectors in which the Bank works
- To showcase concrete examples of how Bank projects in various sectors have successfully incorporated CPTED methodology to address crime and violence and perception of fear
- To discuss possible new ways the Bank can continue to mainstream and incorporate CPTED methodology across its projects in the future
- To leverage existing partnerships such as the Medellin Partnership, and to create future learning exchanges

## **Agenda**

### **Introductory remarks: Chairs: Ellen Hamilton and Phoram Shah (10 min)**

History and evolution of CPTED methodology; theory; key principles; and international best practices.  
Presenter: Macarena Rau, President, International CPTED Association, ICA (via videoconference) (15 min)

### Presentations on Bank-financed urban upgrading projects incorporating CPTED methodology

- Kenya KISIP (Sheila Kamunyori, Urban Specialist) (12 min)
- Jamaica ICBS and ICDP (Ellen Hamilton, Lead Urban Specialist)

### **Q&A session/open floor discussion (30 min)**
