Fiscal Capacity and Economic Development

Limited Enforcement in Weak States

Enforcement increases compliance (Kleven et al. 2011; Slemrod 2019)

Limited Enforcement in Weak States

Enforcement increases compliance (Kleven et al. 2011; Slemrod 2019)

Figure: Market during COVID-19 mask mandate

but weak states...

- Unable to enforce (low capacity)
- Unwilling to enforce (citizens' demands \uparrow , votes \downarrow)

Limited Enforcement in Weak States

Enforcement increases compliance (Kleven et al. 2011; Slemrod 2019)

Figure: Market during COVID-19 mask mandate

but weak states...

- Unable to enforce (low capacity)
- Unwilling to enforce (citizens' demands \uparrow , votes \downarrow)

We ask: In weak states, what strategies boost tax compliance?

Canonical Argument: Voice in government \uparrow , compliance \uparrow

- Voice \rightarrow legitimacy: Locke's *Second Treatise* (1690)
- Voice \rightarrow fiscal capacity: North & Weingast 1989; Bates & Lien 1985

Figure: No Taxation without Representation!

PB: Deliberation and direct decision-making about govt budget

Our study: PB in Freetown during tax reform:

- added over 60,000 taxable properties
- property tax potential ↑ (X5); collected revenue ↑ (X3)
- introduced a transparent and objective valuation system.
- was politically fraught and challenged by central government.

PB: Deliberation and direct decision-making about govt budget

Our study: PB in Freetown during tax reform:

- added over 60,000 taxable properties
- property tax potential ↑ (X5); collected revenue ↑ (X3)
- introduced a transparent and objective valuation system.
- was politically fraught and challenged by central government.

Research Questions:

- 1 Does **PB** increase govt legitimacy?
- 2 Does **PB** increase tax compliance?

- 1 Digital Town Hall (deliberation via WhatsApp group chats)
 - **Horizontal deliberation:** participants discuss preferred service improvements in ward.
 - **Preference articulation:** participant preferences shared with political representatives.
 - **Vertical interaction:** Councilors respond by video to voiced preferences + reveal list of service projects.
 - **Decision making:** Participants deliberate and vote for services.
 - projects: 15 million leones (\approx \$1,500)
 - Mayor announces winner in each ward through video.
- 2 Service delivery

Vertical interaction:

Decision making:

Q1.

Which project would you like to be implemented in your ward?

Each project is worth 15 million leones.

Fixing of potholes

A new water hand pump

2 new solar street lights

Fixing of water pipes

50m of truck tracks

Digital Town Hall in Freetown

Service Delivery:

Sample: Property owners with properties above median value

- $N = 3,618$ property owners

Sample, Randomization, Estimation

Sample: Property owners with properties above median value

- $N = 3,618$ property owners

Randomization: Matched pairs, using baseline data

Sample: Property owners with properties above median value

- $N = 3,618$ property owners

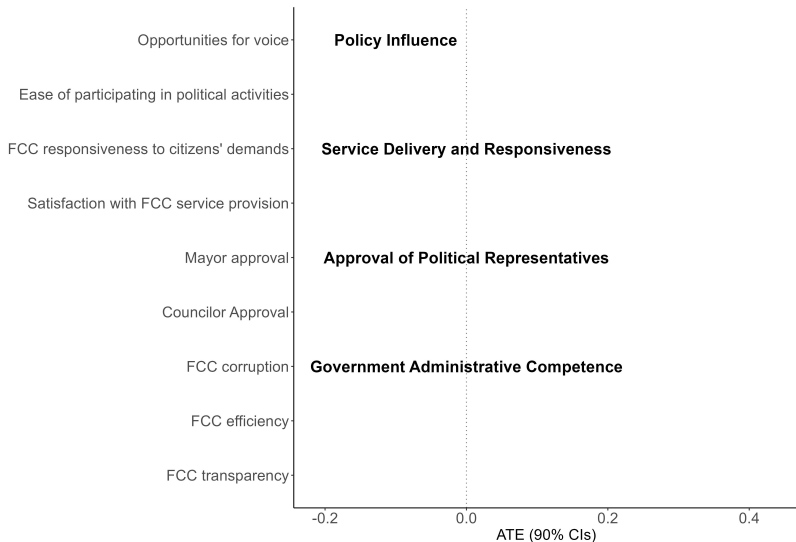

Randomization: Matched pairs, using baseline data

Specification:

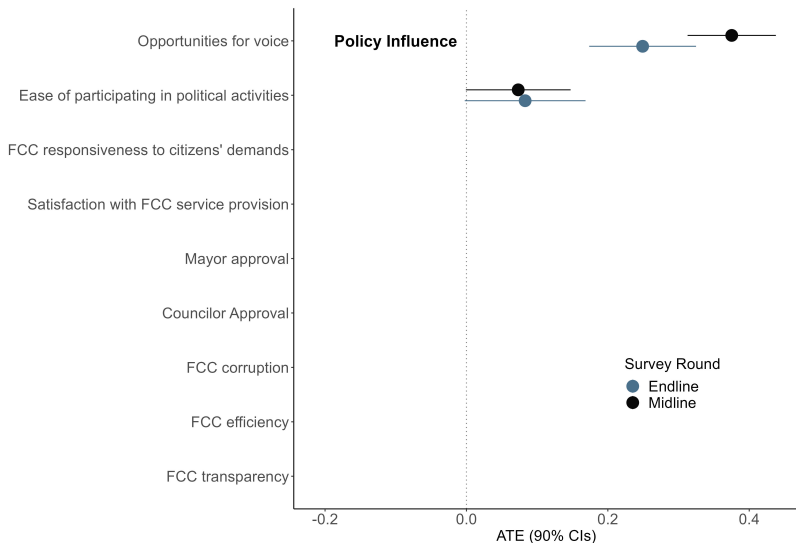

$$Y_{ijt_2} = \beta_1 DTH_i + \gamma Y_{ijt_1} + \lambda \mathbf{X}_i + \theta_j PAIR_{ji} + \delta_w + \epsilon_i$$

- Y_{ijt_2} : post-treatment outcome
- DTH_i : Treatment indicator
- Y_{t_1} : pre-treatment value for outcome of interest
- \mathbf{X}_i : Preregistered **controls** (tax compliance only)
- $PAIR_j$: matched-pair indicator
- δ : ward fixed effects

Treatment Effects on Legitimacy Outcomes

Treatment Effects on Legitimacy Outcomes

Treatment Effects on Legitimacy Outcomes

RQ1: Does PB increase govt legitimacy? ✓

Tax Compliance, 2022 (main outcome of interest)

RQ2: Does **PB** increase tax compliance?

Tax Compliance, 2022 (main outcome of interest)

RQ2: Does PB increase tax compliance? No.

Why the null effect on compliance?

Potential explanations:

- 1 Impacts alternative mechanisms?

Why the null effect on compliance?

Potential explanations:

- ① Impacts alternative mechanisms?
 - At endline, no effect on (i) enforcement, (ii) fairness, (iii) Neighbors' compliance

Why the null effect on compliance?

Potential explanations:

- ① Impacts alternative mechanisms? **Unlikely.**
 - At endline, no effect on (i) enforcement, (ii) fairness, (iii) Neighbors' compliance

Why the null effect on compliance?

Potential explanations:

- ① Impacts alternative mechanisms? **Unlikely.**
 - At endline, no effect on (i) enforcement, (ii) fairness, (iii) Neighbors' compliance
- ② Spillover?

Potential explanations:

- ① Impacts alternative mechanisms? **Unlikely.**
 - At endline, no effect on (i) enforcement, (ii) fairness, (iii) Neighbors' compliance
- ② Spillover?
 - Restricted sampling: 15+ meters between units
 - Spillover analysis: < 1pp. (suggestive)

Why the null effect on compliance?

Potential explanations:

- ① Impacts alternative mechanisms? **Unlikely.**
 - At endline, no effect on (i) enforcement, (ii) fairness, (iii) Neighbors' compliance
- ② Spillover? **Unlikely.**
 - Restricted sampling: 15+ meters between units

Potential explanations:

- ① Impacts alternative mechanisms? **Unlikely.**
 - At endline, no effect on (i) enforcement, (ii) fairness, (iii) Neighbors' compliance
- ② Spillover? **Unlikely.**
 - Restricted sampling: 15+ meters between units
 - Spillover analysis: < 1pp. (suggestive)
- ③ Countervailing heterogeneous effects? **Our explanation.**
 - Partisan affiliation
 - Baseline policy preferences

Why the null effect on compliance? Our explanation

Treatment as a **partisan** pitch about tax **policy** (expanding taxation)

Why the null effect on compliance? Our explanation

Treatment as a **partisan** pitch about tax **policy** (expanding taxation)

Why the null effect on compliance? Our explanation

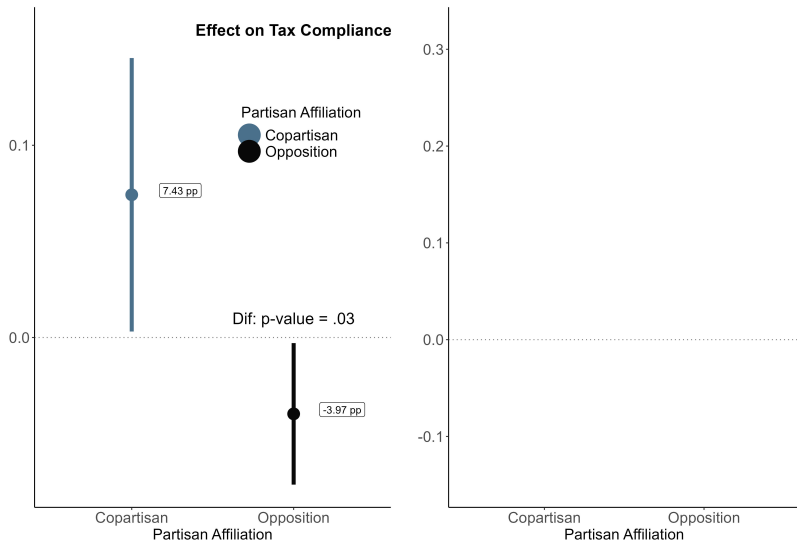

Treatment as a **partisan** pitch about tax **policy** (expanding taxation)

Elite partisan cues can...

- 1 Shift policy preferences for copartisan
 - e.g., Broockman and Butler 2017; Tappin et al. 2023
- 2 and generate backlash from the outgroup
 - Nicholson 2012; Haas and Khadka 2020

Effects Conditional on Partisan Affiliation

Effects Conditional on Partisan Affiliation

Why the null effect on compliance? Our explanation

Treatment as a **partisan** pitch about tax **policy** (expanding taxation)

Why the null effect on compliance? Our explanation

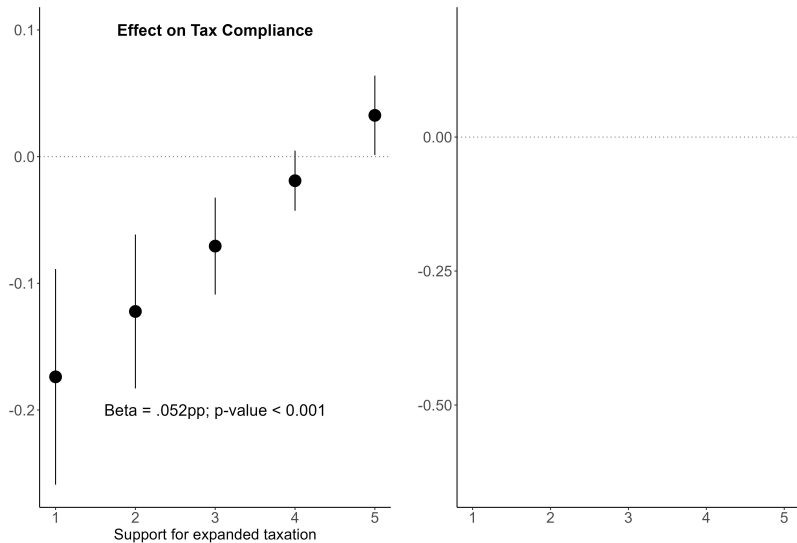

Treatment as a **partisan** pitch about tax **policy** (expanding taxation)

When confronted with persuasive arguments:

- 1 individuals motivated to maintain existing (policy) attitudes
 - Slothuus and De Vreese 2010; Stanley et al. 2020.
- 2 attempts to persuade people their existing beliefs are incorrect may backfire
 - Nyhan and Reifler 2010

Effects Conditional on Baseline Tax Preferences

Effects Conditional on Baseline Tax Preferences

Why the null effect on compliance?

Our explanation: Partisan affiliation and existing tax policy preferences shape the impact of treatment on tax policy preference, which in turn shapes compliance behavior.

Alternative explanations:

Why the null effect on compliance?

Our explanation: Partisan affiliation and existing tax policy preferences shape the impact of treatment on tax policy preference, which in turn shapes compliance behavior.

Alternative explanations:

- Corresponding het effects on legitimacy outcomes.

List of controls in estimation

Preregistered control variables for tax compliance include:

- log total tax liability
- number of properties with any liability
- access to water
- access to drainage
- property in an informal settlement
- property has fencing or gate
- property has garage
- street condition
- street type
- ease of property access
- window quality
- type of tax bill received
- [Back to estimation](#)
